

DOES YOUR ADOLESCENT HAVE A DUST ALLERGY?

LOCAL DOCTORS ARE RESEARCHING AN INVESTIGATIVE DRUG FOR
DUST MITE ALLERGIES THAT'S TAKEN BY MOUTH.

If your adolescent is between 12 and 17 years old (inclusive), has dust mite allergies, and qualifies for this study, he or she may receive the following at no cost:

- ★ Investigative allergy drug taken by mouth
- ★ Close monitoring of his or her allergies by your study doctor
- ★ Reimbursement for time and travel

ASK YOUR DOCTOR FOR MORE INFORMATION ABOUT THE POTENTIAL BENEFITS AND RISKS OF THE STUDY OR CONTACT OUR CLINIC TO SEE IF YOU MAY BE ELIGIBLE TO PARTICIPATE.

THIS STUDY IS ENROLLING NOW – CALL US TO
SEE IF YOUR CHILD MAY QUALIFY.
